This certificate is only valid when reproduced in its entirety. Page 1 of 6

- 3. In all installations the minimum clearance between the underside of panel and the adjoining ground surface level below must comply with the specifications in Part 7.5.7 of the ABCB Housing Provisions.
- 4. No assessment has been undertaken on the product for Part F8 of Vol 1 or Part 10.8 of the ABCB Housing Provisions for Condensation management. A pliable building membrane complying with AS/NZS 4200.1:2017 must be installed in accordance with AS/NZS 4200.2:2017 to separate the wall cladding panels from any water sensitive materials.
- 5. Compliance with B1P1(2)(c) & H1P1(2)(c) excludes resistance to impact loading from windborne debris.
- 6. Axon<sup>M</sup> Cladding must be fixed to a structurally adequate external wall frame in accordance with the appropriate tables in section A5.
- 7. Axon™ Cladding complies with H1D7(4)(b) as cladding that satisfies the following sections of Part 7.5 of the ABCB Housing Provisions:
  - a. 7.5.3(a) for wall cladding boards; and
  - b. 7.5.4(1)(a) for sheet wall cladding; and
  - c. 7.5.5(a) for eaves and soffit linings.
- 8. The structural certification is limited to the cladding only and does not include the sub-structure. The structural support members are designed and engineered separately as per project requirements by building designers and engineers.
- In order to maintain compliance with BAL Low 40, it is the responsibility of the Building Designer to ensure compliance is achieved in accordance with AS 3959-2018.
- 10. This certificate is limited to the details within this certificate including the above compliance elements, product description, purpose or use.
- 11. Other than the items and information listed, the remainder of the information contained in the product's literature is outside the scope of this certification.
- 12. The use of the certified product/system is subject to these Limitations and Conditions and must be read in conjunction with the Scope of Certification below.

**Scope of certification:** The CodeMark Scheme is a building product certification scheme. The rules of the Scheme are available at the ABCB website www.abcb.gov.au. This Certificate of Conformity is to confirm that the relevant requirements of the Building Code of Australia (BCA) as claimed against have been met. The responsibility for the product performance and its fitness for the intended use remain with the Certificate Holder. The certification is not transferrable to a manufacturer not listed on Appendix A of this certificate.

Only criteria as identified within this Certificate of Conformity can be used for CodeMark certification claims. Where other claims are made in a client's Installation Manual, Website or other documents that are outside the criteria on this Certificate of Conformity, such criteria cannot be used or claimed to meet the requirements of this CodeMark certification.

The NCC defines a Performance Solution as one that complies with the Performance Requirements by means other than a Deemed-to-Satisfy Solution. A Building Solution that relies on a CodeMark Certificate of Conformity that certifies a product against the Performance Requirements cannot be considered as Deemed-to-Satisfy Solution.

This Certificate of Conformity may only relate to a part of a Performance Solution. In these circumstances other evidence of suitability is needed to demonstrate that the relevant Performance Requirements have been met. The relevant provisions of the Governing Requirements in Part A of the NCC will also need to be satisfied.

This Certificate of Conformity is issued based on the evidence of compliance as detailed herein. Any deviation from the specifications contained in this Certificate of Conformity is outside of this document's scope and the installation of the certified product will not be covered by this Certificate of Conformity.

**Disclaimer:** The Scheme Owner, Scheme Administrator and Scheme Accreditation Body do not make any representations, warranties or guarantees, and accept no legal liability whatsoever arising from or connected to, the accuracy, reliability, currency or completeness of any material contained within this certificate; and the Scheme Owner, Scheme Administrator and Scheme Accreditation Body disclaim to the extent permitted by law, all liability (including negligence) for claims of losses, expenses, damages and costs arising as a result of the use of the product(s) referred to in this certificate.

When using the CodeMark logo in relation to or on the product/system, the Certificate Holder makes a declaration of compliance with the Scope of Certification and confirms that the product is identical to the product certified herein. In issuing this Certificate of Conformity, CMI Certification Pty Ltd (CMI) has relied on the experience and expertise of external bodies (laboratories and technical experts).

Nothing in this document should be construed as a warranty or guarantee by CMI, and the only applicable warranties will be those provided by the Certificate Holder.

### **APPENDIX A – PRODUCT TECHNICAL DATA**

### A1 Type and intended use of product

Axon<sup>™</sup> External Cladding panels are used as an external wall cladding in alterations and additions and residential single and medium density dwellings where a uniform, broadwall cladding is required. Ideal for full wrap or composite construction design on either timber or steel framed homes.

### A2 Description of product

Axon<sup>™</sup> panels are pre-primed with vertical grooves. There is a ship lap edge joint along the two long edges and square edges along the short edges. The grooves are nominally 2mm deep and 10mm wide. Sheet weighs approximately 12kg/m<sup>2</sup> in equilibrium.

#### Axon<sup>™</sup> Cladding Sheet Sizes

Note: All dimensions and masses are approximate and subject to manufacturing tolerances.

### Components:

Hardie<sup>™</sup> Joint Sealant – General purpose polyurethane exterior grade sealant.

Hardie<sup>™</sup> Weather Barrier – Water barrier and vapour permeable membrane compliant to AS/NZS 4200.1:2017.

RAB<sup>™</sup> Board – Airtight, weatherproof, vapour permeable and non-combustible rigid 6mm fibre-cement sheeting compliant to AS/NZS 4200.1:2017 & AS/NZS 2908.2:2000.

Hardie<sup>™</sup> 9mm Aluminium Recessed Horizontal Jointer - A recessed horizontal jointer that creates a 6mm horizontal shadow line.

Hardie<sup>™</sup> Horizontal h Flashing – Aluminium extrusion used along horizontal control joints.

Hardie<sup>™</sup> Edge Trim – Powder coated aluminium architectural slab edge solution.

Hardie<sup>™</sup> 9mm Internal Corner – Aluminium extrusion to be used in internal corners.

Hardie<sup>™</sup> 9mm External Square Corner - Aluminium extrusion to be used in external corners.

Hardie<sup>™</sup> Corner Flashing – Colorbond<sup>®</sup> steel used behind cladding at internal and external corners.

Hardie<sup>™</sup> Axent<sup>™</sup> Trim – Material composite trim used for box corners and around windows and doors.

Hardie<sup>™</sup> Foam Back Sealing Tape – Installed under sheet vertical joints to improve water tightness.

#### Australia A3 Product specification

Material

CODEMARK

The basic composition is Portland cement, ground sand, cellulose fibre and water. James Hardie building products are manufactured to Australian/New Zealand Standard AS/NZS 2908.2:2000 'Cellulose-cement products-Flat sheet.' Axon™ External cladding panels are classified Type A, Category 3 in accordance with AS/NZS 2908.2:2000.

#### A4 Manufacturer and manufacturing plant(s)

Axon™ Cladding Panels are manufactured in Australia by James Hardie Australia Pty Ltd. Contact Certificate Holder for details.

A5 Installation requirements

Bushfire

Axon<sup>™</sup> Cladding Panels must only to be installed in accordance with the <u>Axon<sup>™</sup> Cladding Installation Guide August 2024</u>.

A suitable weather barrier must be installed behind Axon<sup>™</sup> cladding in accordance with the relevant requirements of the BCA and the AS/NZS 4200.2:2017 Pliable building membranes and underlays – Installation. James Hardie recommends HardieWrap<sup>™</sup> Weather Barrier – refer to the building designer, certifier, or other relevant expert, for suitability.

Refer to the <u>Axon™ Cladding Installation Guide August 2024</u> for Stud Spacings and fixing requirements.

Certificate number: CM40222-I03-R00

### A6 Other relevant technical data

When installing Axon<sup>™</sup> Cladding Panels in combination with other CodeMark certified Hardie<sup>™</sup> Cladding Products, refer to the Hardie<sup>™</sup> Architectural Collection Joints and Junctions Application Guide on James Hardie's <u>website</u>. The construction drawings presented on the Application Guide have been reviewed, based on the requirements of NCC 2022 Vol 1 and 2 as described on the 080920230905 – JHR Advisory Note – HAC Opinion Based Upon Tested Prototype Compliance Note V1.1. Compliance to Weatherproofing provision is subject to Limitation and Conditions No. 2 as outlined on this Certificate of Conformity.

Thermal	Axon™ Cladding panels will contribute to the overall thermal performance of the building; however, it is the responsibility of the building designer to ensure the minimum thermal requirements for the building envelope is achieved.
Resistance to fire	Testing has been conducted by CSIRO on the James Hardie Cladding materials in accordance with AS/NZS 3837:1998 and are classified as conforming to Group 1 material. (Average Specific Extinction Area 10.4m <sup>2</sup> /Kg).
